With a lean 7-simulator model and multiple revenue streams—including pay-per-play rentals, memberships, and high-margin F&B sales—Par 4 Golf is projected to generate \$1,512,000 in revenue and approximately \$1,148,000 in net profit in Year 1 at 80% utilization.

Located in West Hollywood's premium entertainment market, this investment presents an exciting opportunity to capitalize on the rising demand for tech-driven golf experiences, backed by strong profitability, efficient operations, and scalable growth potential.

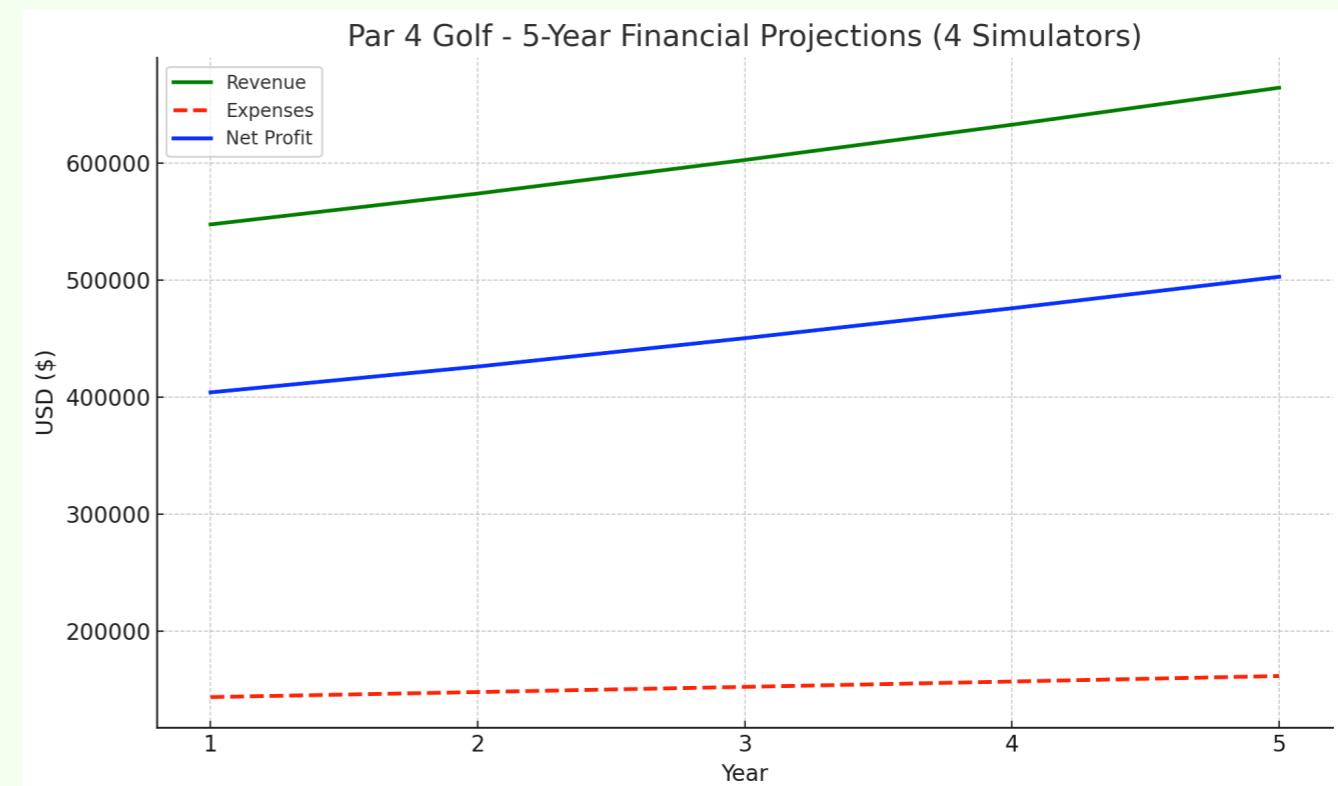

FINANCIAL PROJECTIONS

Par 4 Golf is projected to deliver strong financial performance with a lean 7-simulator model and efficient startup investment. In Year 1, revenue is estimated at \$1,512,000, with net profits of approximately \$1,148,000 after expenses of \$363,000. With steady growth, annual revenue is expected to reach \$1,835,040 by Year 5, with net profits approaching \$1,393,000.

These projections are based on 80% utilization across 7 simulators operating 14 hours per day, 7 days a week—yielding approximately 2,376 rental hours per month. Revenue is generated through pay-per-play sessions, recurring memberships, and high-margin F&B sales. Expenses are forecasted to grow at 3% annually, while revenue grows at 5%, supporting a scalable and resilient financial model.

The business reaches breakeven at just 840 rental hours per month (\$50/hour), a highly attainable benchmark given the location's total monthly capacity of nearly 2,940 hours.

Additional revenue opportunities, including locker rentals and packaged F&B, further enhance the customer experience and increase dwell time, providing incremental upside and encouraging repeat business.
